

Serial No. 10/725,392

Amendment dated February 16, 2005
In Reply of Office Action dated December 17, 2004

Amendments to the Claims:

The listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1 (currently amended). A pocket chamber calendar assembly blank for receiving a notice or the like with a portion of the notice when positioned in the pocket chamber extending outwardly therefrom for ease in removal comprising:

- a) front and back panels;
- b) said front and back panels each having front and back sides and upper and lower portions;
- c) said front and back panels being substantially the same dimensions with said front panel positionable over and coextensional with said back panel and connectable thereto;
- d) said front and back panels having bottom, left and right side edges, which when positioned coextensively, are interconnected and form a pocket chamber;
- e) said front panel having a U-shaped slit on said upper portion extendable into said pocket chamber and extending from adjacent said front panel left and right side edges and serving as an opening into said pocket chamber for a notice to

be easily inserted therein when said front and back panels are interconnected;

f) one of said front and back panels lower portions including a glue strip stop for limiting the depth of insertion of a notice and for bonding together said front and back panels a distance approximating the width of a notice to be received in said pocket chamber and extending parallel to said U-shaped slit and of a length slightly less than said U-shaped slit;

g) said front and back panels being integral and joined by a fold line forming the right edge of said front and back panels and including glue means for securing said left edges together when said panels are positioned for forming said pocket chamber calendar;

h) one of said panels bottom edge having a foldable flap positioned a distance beneath said glue strip stop and forming the bottom of said pocket chamber and extending from adjacent said panels' left side edge to adjacent said panels' right side edge and substantially longer than said U-shaped slit; and

In Reply of Office Action dated December 17, 2004

i) said foldable flap having a glue strip substantially the length of said foldable flap and longer than said glue strip stop to permit spacing between said front and back panels when said blank is assembled into said pocket chamber calendar for ease of insertion of a notice into said pocket chamber.

2-4 (cancelled).

5 (previously presented). A pocket chamber calendar assembly blank as in claim 1, wherein:

a) at least one of said panels has a top edge including means for securing the pocket calendar to a wall surface for hanging purposes.

6 (previously presented). A pocket chamber calendar assembly blank as in claim 5, wherein:

a) said at least one of said panels means for receiving the pocket calendar to a wall surface has an upwardly extending tab from said top edge for receiving a wall hanger.

In Reply of Office Action dated December 17, 2004

7 (previously presented). A pocket chamber calendar assembly blank as in claim 5, wherein:

a) each of said panels is provided with a top edge and including cooperating upwardly extending tabs from said top edges for receiving a wall hanger.

8 (previously presented). A pocket chamber calendar assembly blank as in claim 1, wherein:

a) said front panel front side and said back panel back side include indicia information.

9 (previously presented). A pocket chamber calendar assembly blank as in claim 1, wherein:

a) said U-shaped slit has upwardly extending legs creating a flap.

10 (currently amended). A pocket chamber calendar for receiving a notice or the like with a portion of the notice when positioned in the pocket chamber extending outwardly therefrom for ease in removal comprising:

- a) front and back panels;
- b) said front and back panels each having front and back sides and upper and lower portions;
- c) said front and back panels being substantially the same dimensions with said front panel positioned over and coextensive with said back panel and connected thereto;
- d) said front and back panels having bottom left and right side edges connected and forming a pocket chamber;
- e) said front panel having a U-shaped slit on said upper portion extending into said pocket chamber and adjacent said front panel left and right side edges and serving as an opening into said pocket chamber for a notice to be easily inserted therein.
- f) said front and back panels lower portions including a glue strip stop for limiting the depth of insertion of a notice and bonding together said front and back panels a**

distance approximating the width of a notice to be received in
said pocket chamber and extending parallel to said U-shaped slit
and of a length slightly less than said U-shaped slit;

g) one of said panels' bottom edge having a foldable
flap folded inward and forming the bottom of said pocket chamber
positioned a distance beneath said glue strip stop and inserted
between said front and back panels and forming the bottom of
said pocket chamber and extending from adjacent said panels'
left edges to adjacent said panels' right edges and
substantially longer than said U-shaped slit; and

h) said foldable flap having a glue strip secured to
the other of said panels substantially the length of said
foldable flap and longer than said glue strip stop to permit
spacing between said front and back panels for ease of insertion
of a notice into said pocket chamber.

15(cancelled).

16(previously presented). A pocket chamber calendar as in
claim 10, wherein:

a) said front panel front side and said back panel
back side include indicial information.

17(previously presented). A pocket chamber calendar as in
claim 10, wherein:

a) said U-shaped slit has curved upwardly extending
legs.

18-23(cancelled).

24(new). A pocket chamber calendar as in claim 16 and
wherein:

a) said indicia information on said front panels'
front side includes two different calendars.
